Panama City, Fla.— The Florida Department of Health in Bay County (DOH-Bay) confirmed today that a 57-year-old Bay County man, diagnosed with COVID-19 May 23, passed away June 2. He is the fourth Bay County resident to die from COVID-19, the novel coronavirus.

DOH-Bay offers condolences to the latest victim's family and will continue to work diligently with our community partners to prevent the spread of COVID-19.

DOH-Bay has also confirmed seven additional cases of COVID-19, including a 58-year-old male, a 29-year-old male, a 40-year-old male, a 24-year-old female, a 21-year-old female, a 33-year-old male, and a 49-year-old male. Six of the new cases had prior contact with a confirmed case. Bay County's total diagnosed COVID-19 cases now stands at 111, including three non-resident cases.

DOH is conducting contact investigations and working to identify and notify individuals who need to self-monitor for symptoms for 14 days. Contact investigations are a critical way for staff epidemiologists to track and prevent the spread of disease.

Bay County's overall COVID-19 positive testing rate is 3 percent. Of the 4,162 tests processed, 4,049 tests are negative. Four Bay County residents, or 4 percent of all positive Bay County cases, have died from COVID-19. A total of 13 Bay County residents, or 12 percent of all cases, have been hospitalized with COVID-19.

Data is preliminary and subject to change based on public health investigations. One case from June 3 was transferred to another county, and another case was determined to be a non-resident. Resident addresses are established by zip code, whether an address is located inside municipal city limits or not.
